Confirmation durability 2K Sealing adhesive SX1

Dear Mr., Mrs.,

by German law we as the manufacturer are responsible for the orderly function of 2K Sealing adhesive SX1 as a sealant for concrete construction for a period of 5 years. With other words: If it shows that the proper function of 2K Sealing adhesive SX1 is not given due to a failure of the material as such than we are responsible within the range of the product warranty.

We as ankox GmbH are busy on the waterproofing market since more than 20 years and of course we stand for quality and functionality of our products. We do not only invest a lot of time and money in the development and manufacturing of waterproofing products but also in testing.

With this knowledge and with the high quality components we use to manufacture 2K Sealing adhesive SX1 we see no restrictions confirming a durability of 25 years for 2K Sealing adhesive SX1 as waterproofing product as such provided the material has been applied in accordance with the manufacturers guidelines.

Please bear in mind that the durability of 2K Sealing adhesive SX1 is also depending on the onsite conditions (f.e. pH-value, temperature, mechanical stress, etc.), the construction itself and of course the installation of the product. From the judicial point of view we cannot take over any guarantee if we have no knowledge about these factors, respectively if we were not involved in the installation of the product.

Yours sincerely,

M. Weichert
